

Investment Objective

The investment objective of MOAT UpperCrust Wealth Fund (UCWF) is to generate superior long-term capital appreciation by investing in a concentrated portfolio of high-quality businesses with **durable competitive advantages (economic moats)**, tailored to each client's individual financial goals and risk profile.

Fund Facts

UCWF Inception Date

20th Jan 2022

Investment Universe

The Fund allocates across four asset classes – equity for growth, precious metals as a strategic hedge and wealth preserver, REITs/InvITs for stable income generation, and a small cash buffer for liquidity and tactical deployment.

Investment Horizon

UCWF is best suited for investors with a minimum investment horizon of 5 years or longer. The fund's moat-driven approach is designed to reward patient, long-term capital.

Market Capitalization

Large Cap: 45.57%

Mid Cap: 12.36%

Small Cap: 0.00%

Others: 43.70%

Avg. Weighted Market Capitalization ₹1,45,956 Crs.

Benchmark & Rationale

BSE 500 TRI is a broad based, total return index comprising 500 companies across large, mid and small segments making it an appropriate benchmark for a portfolio that seeks high-quality investment opportunities across the full market capitalisation spectrum

UpperCrust Wealth Fund

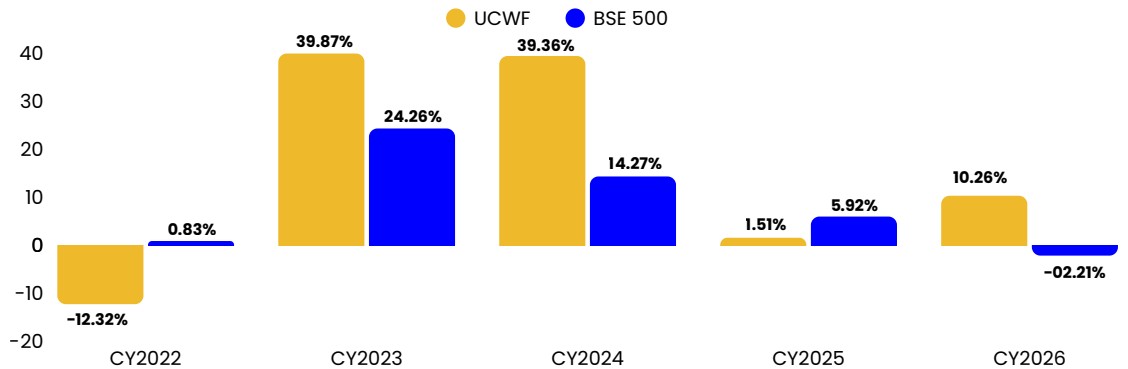

Investment Strategy

The MOAT UpperCrust Wealth Fund (UCWF) follows a bespoke, client-first approach – each portfolio is individually constructed to align with the investor's unique financial goals, risk appetite, and time horizon. The Fund invests exclusively in companies with identifiable and sustainable competitive advantages, or “**economic moats**” – businesses that demonstrate pricing power, brand dominance, network effects, cost advantages, or high switching costs. Using a rigorous Top-Down fundamental research process, the portfolio manager selects 15–25 high-conviction stocks across market capitalizations, seeking companies where the moat is not only wide but durable, ensuring long-term compounding of wealth for its clients.
